

Manik Chaudhary

Noida, India | maniksingh873@gmail.com | +91 9810190643 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Education

Vellore Institute of Technology (VIT), Vellore

B.Tech, Computer Science and Engineering (Core)

August 2023 – July 2027 (Expected)

- **CGPA: 8.76/10** (through Semester 6). No backlogs.

Experience

EXL Service – Noida, India – On-site

Technology Product Intern

May 2026 – July 2026

- Engineered structured workflows for an agentic insurance automation platform by converting Risk Intake and FNOL processes into **50+ business rules**, validation checks, and developer-ready system specifications.
- Modeled end-to-end claim lifecycle workflows across submission, validation, processing, and assignment stages, documenting **20+ decision points**, exception scenarios, and integration touchpoints.
- Defined data requirements and validation logic for automated FNOL processing across **4 P&C insurance product lines**, improving readiness for backend workflow implementation.

Introis Technologies – Remote

Full-Stack Developer Intern

May 2025 – August 2025

- Led a team of 4 developers to build a warranty-claim platform for Exide Batteries using React, Node.js, and MySQL; delivered RBAC-enabled REST APIs across **3 modules**, reducing manual processing by **50%**.
- Automated ingestion of **40–50 claims/month** via XML pipelines and cron schedulers, and enforced JSON schema validation with deterministic upserts, cutting reconciliation workload by **35%** and manual review time from **2 hrs/day** to **under 30 min**.
- Authored **120+ test cases** spanning 3 modules for QA automation of hospital's financial data pipelines, accelerating regression testing by **40%**, eliminating **15 critical bugs**, and cutting analytics processing from **6 days** to **30 min**.

Technical Skills

Programming:	Python, C/C++, JavaScript, TypeScript
Frontend:	React, Next.js, Tailwind CSS, Bootstrap
Backend:	Node.js, Express.js, FastAPI, REST APIs, JWT Authentication
Databases:	MySQL, PostgreSQL, SQL, MongoDB, Redis, Vector Databases
Cloud and DevOps:	AWS (S3, Lambda), Terraform, Docker, Git, GitHub, CI/CD, Vercel, Agile
Concepts:	Data Structures and Algorithms, RAG Pipelines, LLM Integration, ETL, QA Automation, DBMS, Object-Oriented Programming, Operating Systems, System Design

Projects

CheckPointAI – [GitHub](#)

- Architected a permissioned LLM agent (LangGraph, FastAPI, PostgreSQL) with a **3-tier** risk engine across **5 tools**, auto-executing low-risk calls and halting high-risk ones for approval.
- Implemented distributed tracing with OpenTelemetry/Jaeger spanning **9 agent nodes**, enabling debugging and trace recovery through asynchronous execution workflows.
- Containerized a **5-service** backend (Redis, Celery, Docker) and shipped a Next.js frontend with Clerk auth; validated with **43 passing tests**.

CostGuardian – [GitHub](#) | [Live Demo](#)

- Developed a multi-tenant AWS cost/security SaaS (Python, Lambda, Step Functions, DynamoDB, Terraform) running **15 automated detectors** across **6 AWS services** (EC2, S3, IAM, CloudTrail, RDS, Lambda).
- Enforced a two-layer safety model (human approval + independent policy engine) gating **100%** of mutating actions, using scoped, external-ID-gated cross-account IAM roles instead of stored credentials.
- Verified with **108 passing tests** covering 10 suites; deployed on AWS's Always-Free tier at **\$0/month**, live in production with real connected accounts.

RAG Chat System – [GitHub](#) | [Live Demo](#)

- Built a full-stack RAG chat system (Next.js, TypeScript, Vercel AI SDK) that answers questions grounded only in user-uploaded documents, using per-session namespaced vector search (Upstash Vector) and a relevance-score filter to prevent hallucinated answers from irrelevant matches.
- Measured **+200%** answer-quality uplift over a no-context baseline (LLM-as-judge) and **37.8%** lower time-to-first-token via streaming; load-tested Redis history at **50 concurrent sessions** (p50 430–630ms).

Certifications

- AWS Certified Associate Developer
- Web Development Bootcamp – Udemy
- Data Structures and Algorithms using C/C++ – Udemy
- Deloitte Australia – Data Analytics and Visualization Job Simulation (Forage)

Achievements

- Mozilla Firefox Club – Senior Core Member; led and mentored a team of designers, delivering branding assets and design systems for technical and cultural events.
- Competed in VIT-wide hackathons; collaborated with cross-functional teams to develop and present software prototypes under time constraints.
